YOU KNOW WHAT A FREQUENCY IS GOING TO TRANSMIT...

There's no need to get uptight about missing that important frequency. With Scout Reaction Tune, capturing frequencies is like a day at the beach. Pure bliss! Interface the Scout to the AOR AR8000 and the Scout will not only show you which frequency is being transmitted, but you'll be able to instantly hear the conversation from the AR8000 as well. The Scout can record 400 frequencies into memory, with up to 255 hits per frequency (From 10MHz - 1.4GHz). The Scout distinctively beeps indicating frequency hits, or switch to a pager style vibrator for discreet recording. Built-in rapid charge NiCads provide a full ten hour discharge time.

Portability, functionality and the hand-held size of Scout make it mobile.
